1. The following is an examiner's statement of reasons for allowance:

The invention is directed to laying out print job pages onto recording medium.

Independent claims 1, 7, 13 identify the uniquely distinct features of "successively laying out a last page of a leading print job and a first page of a trailing print job without a gap when a first method is designated as the combine method, laying out the first page of the trailing print job on a surface next to a surface on which the last page of the leading print job is laid out when a second method is designated as the combine method, and laying out the first page of the trailing print job on a sheet next to a sheet on which the last page of the leading print job is laid out when a third method is designated as the combine method."

The closest prior art Gabbe et al. (US 4,928,252), teaches a conventional method of laying out print job pages onto recording medium, either singularly or in combination with other cited references fails to anticipate or render the above underlined limitations obvious (when used in combine with other claimed limitations).

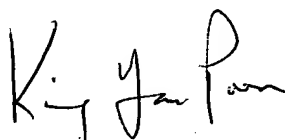

Successively laying out a last page of a leading print job and a first page of a trailing print job without a gap is defined at abstract, lines 6-7, and fig. 30, applicants disclosure; laying out the first page of the trailing print job on a surface next to a surface on which the last page of the leading print job is laid out is defined at page 3, lines 4-7, fig. 29, applicants disclosure; and laying out the first page of the trailing print job on a sheet next to a sheet on which the last page of the leading print job is laid out is defined at page 3, lines 8-10, page 69, lines 24-25, and fig. 28, applicants disclosure.

Art Unit: 2624

The application is also allowable because of the persuasive argument presented by the applicant at page 9, lines 16-23, and page 10, of the remarks filed on 11/22/2004.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to King Y. Poon whose telephone number is (703) 305-0892.
